DETAILED ACTION

The following action is in response to the amendment filed for application 10/756,933 on May 25, 2006.

Allowable Subject Matter

Claims 14-17, and 19-27 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to show or render obvious the method for control of a shifting component as claimed, and particularly including a shifting component having one frictionally engaged element and one form-locking element for transmitting power from a first half of the shifting component to a second half of the component, wherein the transmission capacity of the frictional element is increased prior to the disengagement of the form-locking element, and including the remaining structure and controls of claim 14. The present invention also particularly includes engagement and disengagement of the form-locking device only once a synchronous state for the shifting component exists, and including the remaining structure and controls of claim 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roger L. Pang whose telephone number is 571-272-7096. The examiner can normally be reached on 5:30am to 4:00pm.
